

End-to-End Solutions to Deploy, Manage, Secure Your Business-Critical Applications

Platform Solutions, Inc. has the expertise to effectively deploy and manage your critical business applications. From email and directory services, to back-end databases and web applications we have elegant, efficient solutions to meet your needs. We design our solutions for scalability, availability and peak performance to grow with your organization. We will collaborate with you to understand your specific business needs and deliver the highest value to your organization. We have expertise to design, implement, troubleshoot and support your Microsoft, Unix and Linux application infrastructures. Our solutions include, but are not limited to:

**Email and Directory Services** – Whether you use Microsoft Exchange and Active Directory, or Linux LDAP and Sendmail, we have the experience to deliver these applications to user bases ranging from small businesses to large enterprise environments.

**Application Delivery** – We use technologies such as Citrix and Windows Terminal Services to deliver applications to diverse users and efficiently maintain centralized control over them. Bandwidth optimization and caching solutions allow us to extend these services to remote sites without oversubscribing your WAN.

**Server Monitoring** – We can provide customized monitoring solution to give you at-a-glance information about your application environment. Using HP's iLO and Dell's DRAC you can see your hardware and application service status, disk and processor utilization and history in configurable dashboards.

#### About Platform Solutions

Platform Solutions has delivered enterprise-level IT solutions to a wide variety of organizations since 2000. We specialize in advanced networking, unified communications, security, storage, virtualization, and application infrastructure solutions. As a value-added technology reseller, we partner with only best-of-breed industry leaders that meet the business needs of our clients. We use our expertise to deliver streamlined solutions customized to the unique needs of your business. Leveraging leading deployment and management methodologies from leaders such as Cisco, Microsoft and the Project Management Institute, we ensure you receive the technology solutions you require, delivered with the highest level of service.

**We can provide the best-in-breed technologies to optimize your infrastructure.**

## Why Platform Solutions?

### Key Benefits

- Certified technical team with extensive real-world experience
- Strong focus on customer service and satisfaction
- Broad technology profile
- Partnerships with industry-leading technology manufacturers
- Knowledge and understanding of manufacturer programs and promotions

### Complementary Solutions

#### Advanced Networking

- Networked storage and enterprise computing integration
- Service-provider class network design and implementation
- Unified communications
- Network security
- Network management
- Wireless network assessment, design and implementation

#### Security

- Assessments, penetration testing
- Network and system security
- Compliance
- Policy development and management

#### Storage

- Information lifecycle management
- Storage compliance requirements
- Optimized WAN storage
- Enterprise backup
- Disaster recovery
- Business continuity

#### Virtualization

- Server and desktop virtualization strategies
- Data center
- Storage integration
