

Connect and share in powerful new ways to accelerate decision making, gain productivity, and strengthen competitive advantage

Office Phone. Cell Phone. Home Office Phone. Fax. Email. Instant Message.
Today, more than ever, we are bombarded with ways to communicate with one another. However, have the disparate communication mechanisms left your organization feeling more out of touch?

Bring on the power of Unified Communications – a way to streamline your communication systems to gain productivity and improve the way people connect, share and work together. Real-time collaboration is essential to meet the needs of a new generation of employees who have unique workspace requirements and use a multitude of communication tools and devices to get their jobs done.

Unified Communications combines all forms of business communications into a single, unified system that provides powerful new ways to collaborate. Cisco Unified Communications gives companies the ability to:

- Collaborate across any workspace: Advanced collaboration tools make it possible to create high quality, secure, adaptive workspaces throughout your organization.
- Accelerate decision making: capabilities such as presence, instant messaging, and rich media services help ensure that information reaches the right person right away.
- Integrate with other industry-leading applications: Integrates with other industry-leading applications and a wide variety of endpoints, so workers can collaborate in real time using their choice of tools and applications.

Platform Solutions: Your go-to Cisco partner.

Leveraging our expertise in Cisco's unified communications solutions, and adjacent network and application infrastructure technologies, Platform Solutions works with you to plan, design and implement an architecture that meets your specific business needs and requirements. Our expert team of technical specialists, including CCIEs, CCVPs, CCNAs and CCDPs, can help you deliver a secure, manageable framework that encourages innovation and improves productivity through collaboration. Now you can easily and cost-effectively implement a rich and intuitive user interface to accelerate productivity with solutions encompassing unified communications, video, and web applications for workspace sharing.

Contact us today to explore how unified communications can help your organization:

- Connect and collaborate with people anywhere using virtually any device
- Deploy a rich set of easy-to-use features and functions on a single, open platform
- Easily migrate, update, manage, and scale to meet your evolving needs
- Extend current IT investments and reduce total cost of ownership

Discover how Platform Solutions and Cisco can help you improve your business success. Schedule a complimentary Collaboration Business Assessment today to better understand how this solution can help your business connect with people, resources, and opportunities everywhere – today and into the future.

Why Platform Solutions?

Key Benefits

- Certified technical team with extensive real-world experience
- Strong focus on customer service and satisfaction
- Broad technology profile
- Partnerships with industry-leading technology manufacturers
- Knowledge and understanding of manufacturer programs and promotions

Solutions

Advanced Networking

- Networked storage and enterprise computing integration
- Service-provider class network design and implementation
- Unified communications
- Network security
- Network management
- Wireless network assessment, design and implementation

Security

- Assessments, penetration testing
- Network and system security
- Compliance
- Policy development and management

Storage

- Information lifecycle management
- Storage compliance requirements
- Optimized WAN storage
- Enterprise backup
- Disaster recovery
- Business continuity

Virtualization

- Server and desktop virtualization strategies
- Data center
- Storage integration

Application Infrastructure

- Email and directory services
- Application delivery
- Server monitoring technology
